

“DMX1” DMX Interface for RGBBox

DMX interface for RGB systems

- DMX512 interface to be combined with PWM driver RGBOX
- Input supply by polarized connection cable - IP00 - Insulation class II
- 9 DIP switches to select the first address (3 channels)
- Self-test to check all functions.
(when illuminated, the 2 LEDs on the board indicate ON mode and receiving DMX signal.)

(supply connection cable for driver RGBox included)

Model	Input	Output	Dimensions A x B	oz.	Part Number
DMX1	DMX512	3 X PWM 200Hz	2.0" x 0.8"	0.7 oz.	QT-DMX00000
